Abstracts of these reports are available now
521 unique articles this week

Please examine the [SafetyLit.org](http://www.safetylit.org) homepage and send comments about the quality of the translations. With the exception of special help with Chinese, Portuguese, and Spanish; the existing translations were done by volunteers who had no previous exposure to the ideas behind injury prevention. If SafetyLit readers like the idea of the static text on SafetyLit being available in multiple languages and agreement can be reached on the level of quality; we will implement this throughout the site. Remember, this will be for the static parts of SafetyLit. We will not translate each article title and abstract. We may consider offering machine translations of the abstracts through Google much like that provided with many of the Taylor and Francis journals on their website.
