

Weekly Literature Update Bulletin

SafetyLit is a free service of the
SafetyLit Foundation
in collaboration with San Diego State University and the
World Health Organization.

19 July 2015
Volume 18, Number 29
ISSN 1556-8849

<http://www.safetylit.org>

Click on the title of a report to view the full citation and abstract.

Abstracts of these reports are available now
394 unique articles this week

Authors (and aspiring authors): Please, right now, obtain an ORCID identification number. ORCID IDs cost you nothing more than the few moments needed to enroll. (<https://orcid.org/register>) ORCID allows you to enter all of your publications but that can wait for later.

Already have an ORCID ID? Please send SafetyLit an email to let us know.

Most authors have publications with different representations of their names. This can cause problems with indexing. Did you know that almost half of the queries of the SafetyLit database are by author name? If your works are under variants of your name, searchers may miss some of your publications.

SafetyLit tries to make it easy for those who are writing manuscripts. SafetyLit provides accurate item metadata for download that is suitable for any of the several bibliographic management software packages (Zotero, Papers, Mendeley, EndNote, etc.). Some publication reference styles (especially Chicago and APA styles) require author names to be as complete as the most complete name version included.

For example, the Chicago Manual of Style states:

"Authors' names are normally given as they appear on the title pages of their books or above their articles. Certain adjustments, however, should be made to assist correct identification. First names may be given in full in place of initials. If an author uses his or her given name in one cited book and initials in another (e.g., "Mary L. Jones" versus "M. L. Jones" versus "Mary Jones" versus "Mary Lois Jones" versus "M. Jones"), *the same form, preferably the fuller one, should be used in all references to that author. To assist alphabetization, middle initials or names should be given wherever known*". [¶14.72] (emphasis added) There are similar requirements with other citation styles. Without some assistance, it can be all but impossible to follow this requirement. How is one to know if the M.L. Jones is Mary L. Jones, Michael Lewis Jones, or someone else? For some university professors, this blind attention to following the details of a style guide can make the difference between a passing or a failing grade. For manuscript submission this can be the difference between acceptance and rejection as attention to citation formatting may be used as a gauge of an author's attention to scholarly detail.

Is this pdf version too cluttered and too long? There are alternatives:

- 1) Use your PDF viewer's "bookmarks" (Adobe) or "Table of Contents" (Preview) function** to jump to categories of interest to you. All items appear under several categories.
- 2) You may want to view the [Web Version](#).** This allows you to select tick boxes to only see items in the categories the meet your interests. This is also the best version for users with a slow internet connection.
- 3) Try using the [My SafetyLit tool](#).** Register to log in and automatically find articles on the topics you want, week after week, after you set your preferences the first time. Soon the options and limits will allow you to fine-tune the weekly update to closely match your needs.
- 4) Consider subscribing to one or more of the SafetyLit RSS feeds.** An added benefit to this is that you can read the update in near real-time (as items are entered into the database) or as infrequently as once a month without missing anything.

The SafetyLit Foundation has been designated a not-for-profit 501(c)(3) public charity by the US IRS.
Please consider making a donation to support the costs of operating SafetyLit
