

Weekly Literature Update Bulletin

SafetyLit is a free service of the
Center for Injury Prevention Policy and Practice
at San Diego State University in collaboration with the
World Health Organization.

22 June 2009
Volume 12, Number 25
ISSN 1556-8849

<http://www.safetylit.org>

Click on the title of a report to view the full citation and abstract.

Clicking on the Acrobat (light-blue) Bookmark symbol to the left of your pdf-reader screen will display a column of "bookmark" links that will allow you to jump to article listings under any of the SafetyLit categories.

Abstracts of these reports are available now

Search System Improvements

Concepts important to injury research and prevention are often known by several terms. Thus a comprehensive search can be difficult. For example, baby walkers are also known as babywalkers (leaving out a space makes a difference in searching), infant walkers, youpala, etc. Driving under the influence of beverage alcohol is labeled drink driving, drunk driving, DUI, DWI, "drinking and driving", etc. Now, the advanced search feature contains an index search option. While not yet an index search in the true sense, the new option uses the SafetyLit thesaurus to allow a search using *any single* synonyms for a concept to find ALL articles that are about ANY of the synonyms. Using a simple textword search would require searches using each of the individual synonyms for each concept and awareness of all possible synonyms.

SafetyLit Archive now contains more than 100,000 articles.

This week the contents of the SafetyLit database exceeded 100,000 articles.

Want to find a journal article in a nearby library?

SafetyLit now offers a link to a WorldCat service that allows a user to enter their location and find a list of OCLC-affiliated libraries that hold a particular journal within their collection. More than 10,000 library systems worldwide are participants.

Enter your location in the form and you will receive a list of libraries. This list may be useful to view the journal at the library or to request that your library obtain a copy of the article through inter-library loan. Simple instructions are available at:

<http://www.SafetyLit.org/locate-library.htm>

SafetyLit is Zotero-Ready

Zotero [zoh-TAIR-oh] is a free, open-source, easy-to-use Firefox extension to help you collect, manage, and cite your research sources. This software is a no-cost alternative to better-known packages such as EndNote® or Reference Manager®. For more information about Zotero visit <http://www.zotero.org>. With Zotero you may with one click download SafetyLit article records and then with another click insert the article as a reference in a MS Word document. It is no longer necessary to type your references and citations. If you are writing using, for example, APA style and want to change to another style, say, Vancouver, this can be done with another click of your mouse.

Age: Adolescents

A longitudinal study of the trajectories of deviant behavior among junior high school students.
