11th World Conference on Injury Prevention and Safety Promotion
1-4 October 2012, Michael Fowler Center, Wellington, New Zealand

-- PLEASE HELP --

Many author names are incomplete, inverted, or simply wrong!

Author name errors are common within conference proceedings. In the case of Safety 2012, the usual errors were compounded when translated to electronic metadata by BMJ Group. This was primarily due to name order inconsistencies. The problem was further compounded at CrossRef (the keeper of DOI records). CrossRef records typically shorten author names to a last or family name and a single initial. Thus, the name "Mary Thomas" becomes "Mary, T.". Anyone wanting to find Mary Thomas' works would never guess that her publications would be listed in that format.

Authors of papers and posters presented at Safety 2012: Please find your presentations listed here and provide us with your correct FULL name and the titles of your presentations. Please also visit <http://www.safetylit.org/authors.htm> and help us to condense multiple, duplicate listings of your name into one. Authors with more than one abstract may find that some of their names are correct and others are not. Please send this information to: safetylit@sdsu.edu

Please, send your first, middle, and last names. Also, please clarify if you have a double or triple last name, how (or where) do you want your placed in a list ordered by alphabet.

Senior authors: Please be sure that your students' names are correctly listed.

We will make corrections to the SafetyLit records and forward the revisions to relevant others.

Next week the SafetyLit Weekly Update Bulletin will be a double issue that will include the non-conference articles that were omitted from this issue.
